Certification Assessment

July 2023

MS NIBRS Certification Assessment

This portion is to be completed by the law enforcement agency.

The intent of this certification assessment is to gain an understanding of the capabilities of your agency's Records Management System (RMS); with regard to collecting and reporting crime incident data according to the Federal Bureau of Investigation's (FBI) NIBRS standards. Mississippi follows the FBI's NIBRS standards and does not have any state specific incident-based reporting requirements.

The Vendor Section of the assessment serves as verification that your agency's RMS vendor has validated your agency's RMS to ensure the data elements and values which currently support NIBRS and are available to your agency for reporting purposes.

Instructions: Please complete the Agency Information Section of this questionnaire your agency uses to provide incident information in support of reporting data according to the NIBRS standard. Please answer the questions to the best of your ability. If any question is not applicable to your agency's RMS, please write, "N/A".

Please ask your agency's RMS vendor to complete their portion of this assessment form based upon the operation and structure of your agency's current RMS.

Agency Information

Agency Name:	RMS Vendor:

Respondent:	Role of Respondent:

Staffing/Resources

This purpose of this section is to understand the users of the RMS, how data is entered into the system, and the extent to which agency personnel in your agency can work within the system.

1. Who are the system users? (e.g., officers, supervisory personnel, investigators, records staff, crime analysts, etc.)

2. Who currently enters crime incident data into your RMS? Example: officer or central data processing staff?

3. How is the data collected? Is any of the data first collected via a paper form and then entered into the RMS or entered straight into the RMS?

MS NIBRS RMS Certification Assessment

This portion is to be completed by the agency's RMS vendor.

All vendors are required to have username/password to access the test site.

(MS NIBRS will verify the form is on file.)

RMS Overview

1. Which format does your RMS create a NIBRS report/export file (Flat file/XML)?

2. Does the application or system enforce any of the NIBRS data edit and validation checks at the time of data entry (Yes/No)?

The full list of data edit checks is available in the current NIBRS Technical Specification available at <https://www.fbi.gov/about-us/cjis/ucr/ucr-program-data-collections#National>.

NIBRS-Specific Requirements

The section asks about specific elements of the NIBRS data standard and the ability of the system to collect and store data according to this standard.

3. Please respond to your system's ability to meet the primary aspects of the NIBRS standard. If the NIBRS Requirement meets the standard requirement, please check the box, if it does not meet the standard requirement, please describe:

NIBRS Standard Requirement	Meets the Standard Requirement	Describe, if necessary
Able to collect information about all offenses in an incident	☐	
Detailed offense code assigned to each offense in an incident	☐	
Able to collect up to 10 offenses in an incident	☐	
Able to collect information about Animal Cruelty Offense	☐	
Able to collect information about Human Trafficking Offenses	☐	
Able to collect information about an Identity Theft Offense	☐	
Able to collect information about Hacking/Computer Invasion Offense	☐	
Demographic information stored for each victim in an incident	☐	
Victim injury stored for each victim in an incident	☐	
Demographic information stored for each known offender in an incident	☐	
Relationship between each victim and offender stored for all offenses in an incident	☐	
Track multiple clearances	☐	
Track whether an incident was exceptionally cleared	☐	
Record and store exceptional clearance date	☐	

4. Please review the NIBRS elements in the table below and check each box verifying that the NIBRS Value codes are accurately collected. If not, Please explain. Each of these data elements is described in detail in the NIBRS user manual available at <https://le.fbi.gov/file-repository/nibrs-user-manual.pdf/view>:
